4. Resume and intention

Protection objective of the mission statement of NLP Schwarzwald:

We protect natural processes

In National Park nature may be nature . At a majority of the area, it develops free in accordance with its laws and coincidences, without we engage in the processes . Until the year 2044 75 percent of the National Park area will be left to their natural processes (Developing national park) .

Number of visitors
at 03.10.2015: 8000

We create space for biological diversity

By freely evolving nature National Park creates habitats for rare and endangered species. Some species need special conditions. We preserve this and maintain selected areas (up to 25 percent National Parks)

Program 2015

- more than 300 events show
- the diversity of the national park
- from capercaillie on Forest Theater to Herb Kitchen
- guided tours to unknown views and insights, exciting lectures, the wildlife at culinary hikes with all senses
