## *EU Biodiversity Strategy for 2030: EUROPARC perspective*

*Federico Minozzi*  
*EUROPARC Managing Director*

# PROTECTED AREAS & PEOPLE

# EUROPARC AND THE EU BIODIVERSITY STRATEGY FOR 2030

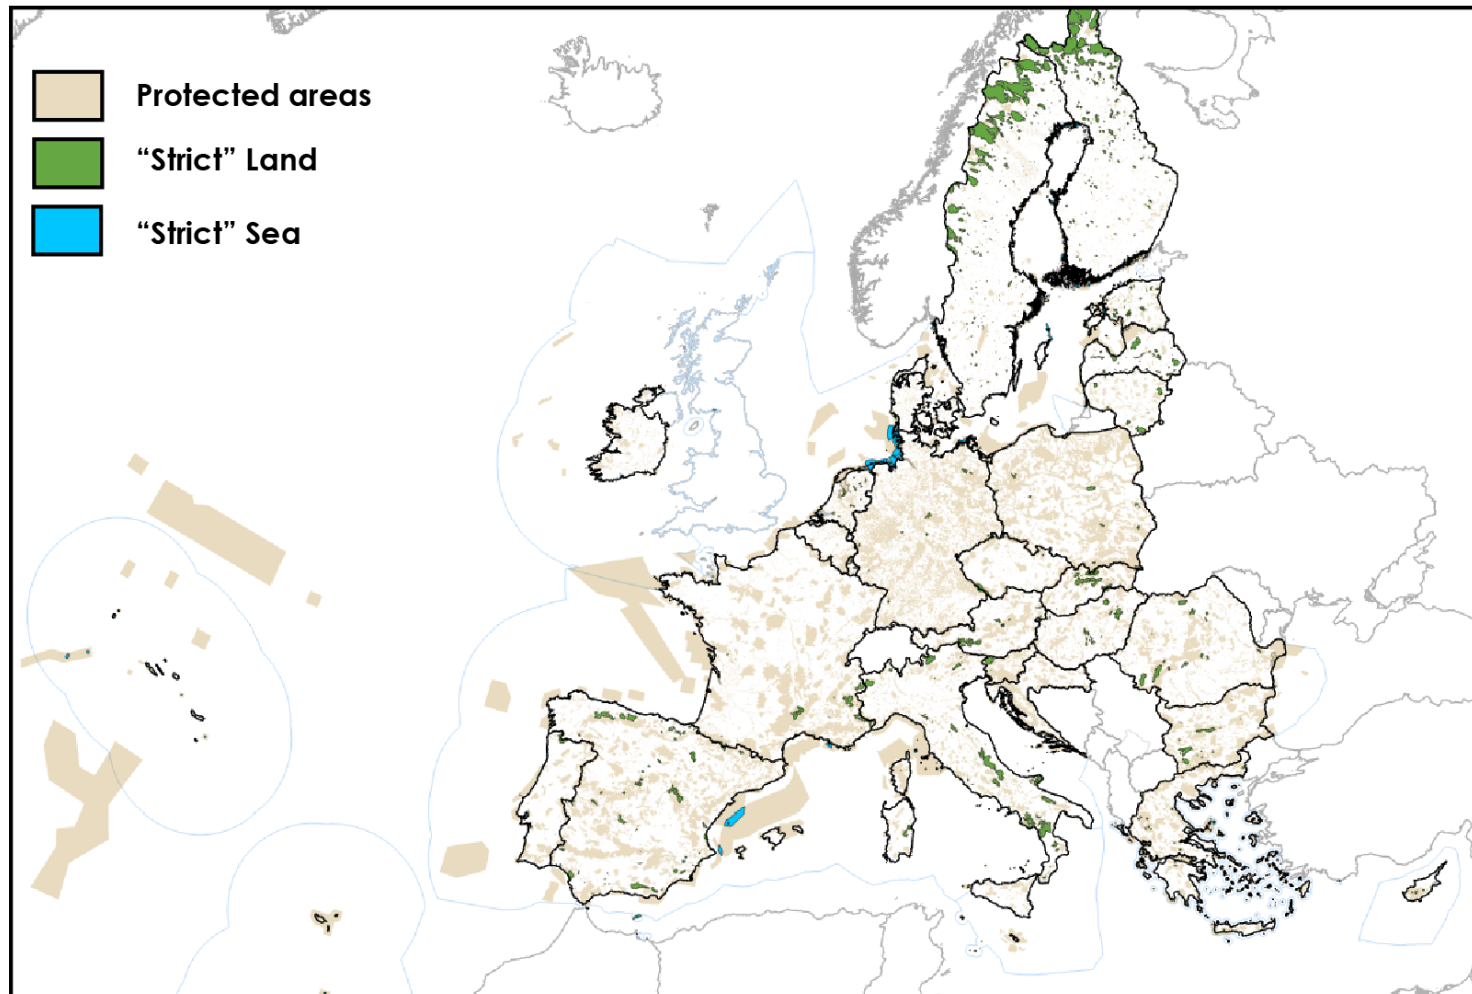

Welcome and support the strategy and targets:

- ambitious
- concrete
- integrated approach
- PAs being recognised

# BUILD A COHERENT NETWORK OF PROTECTED AREAS

## Protected areas in the EU

## IMPLEMENTATION OF THE 30% PAS TARGET

- Values of existing PAs to be identified and assessed
- Target all PAs, not just those only designated for conservation objectives
- New designations will be a crucial asset
- Cannot ignore challenges ahead: build ownership for the process
- Natura 2000 completion and effective implementation as a matter of priority
- Welcome priorities for urban/peri-urban areas

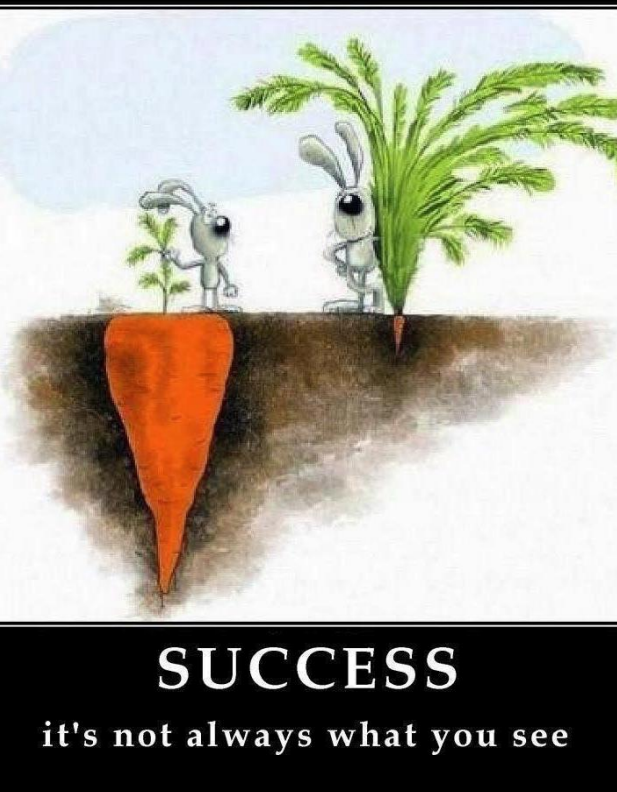

# STRICTLY PROTECT AT LEAST A THIRD OF THE EU's PAs – 10%

- Welcome the target and definition!
- Non-intervention as primary approach
- Some specific management activities for restoration and conservation
- Not as new category of PA
- Do not underestimate implementation challenges
- Build understanding, support, ownership...
- Supporting investments for implementation and enforcement

## EFFECTIVELY MANAGE ALL PROTECTED AREAS

- Management effectiveness crucial for next 10 years
- Designations (10%-30%) won't be enough
- EM: objectives, planning, resources, governance, communication, community engagement
- Not only “measuring tools”
- Develop capacity: new competences required

O

## WHAT EUROPARC IS DOING AND PLANNING

- Platform for dialogue and learning exchange
- Raise awareness and capacity
- Improve management
- Contribute to achieve the 10% and 30% targets
- New and ongoing projects
- EUROPARC strategy for 2030

**THANK YOU**
