

EUROPARC

Coexistence with large carnivores: the role of Protected Areas.

Participatory workshop

You can make it successful:

Are you there?

IMPACT biodiversity and management

- Invest: on skills and capacities
- Inspire: Protected Areas
- Innovate: improve practice
- Influence: decision making and management
- Inform: PAs and stakeholders

INFLUENCE

INFORM

INVEST

INSPIRE

NNOVATE

European policy and initiatives to strengthen coexistence

- **Marco Cipriani**, European Commission

- Katrina Marsden, EU Platform on coexistence between people and large carnivores

Participatory exercise - You: Protected Areas needs and possible actions

Case studies: processes and initiatives for coexistence - Valeria Salvatori, Istituto di Ecologia Applicata.

- Simone Angelucci, Majella National Park.
- **Guillermo Zamora**, Junta de Andalucia.

Your objective today

Why

did you join this workshop? join <u>www.menti.com</u>

Code: **97 82 18**

Our objective today

European policy and initiatives to strengthen coexistence

- Marco Cipriani European Commission
- Katrina Marsden EU Platform for Coexistence between People and Large Carnivores

Time for answers and questions

4 breakout groups

Automatically join preset groups

Answer the 2 questions using Jamboard

30 minutes to discuss, share and learn

Take a break at 11 – <mark>join</mark> back at 11,15!

Group session

- Scroll ← → to go to your group number
- Dig the questions, don't stop at the surface!
- Use sticky notes to write your ideas

Case studies

- Valeria Salvatori, Istituto di Ecologia Applicata.
- Simone Angelucci, Majella National Park.
- Guillermo Zamora, Junta de Andalucia.

Archeological discovery in Switzerland

While you listen to the case studies, please consider the followings:

- How can I improve communication, damage prevention and partnership building?
- What do I need to overcome those issues?

SUCCESS it's not always what you see

THANK YOU
