

Connecting People & Parks since 1973

EUR PARC Conference 2023

TRIBUTE TO OUR LANDSCAPE

Leeuwarden | The Netherlands | 3-6 October 2023

WHERE NATURE AND PEOPLE MEET IN HARMONY

What will we be doing

- Welcome
- PART 1
 - What is management effectiveness
 - Case studies
- PART 2
 - Management Effectiveness in your protected area
 - Our challenges
 - Implementing management effectiveness
- What do we do now?

EUROPARC Conference 2023 – Tribute to our landscape

Where nature and people meet in harmony

What is Management Effectiveness?

Background to management effectiveness The role of the IUCN CBD and EU Biodiversity Strategy 2030 Europarc Management Effectiveness Commission

Effective protected area management should achieve positive and sustained conservation outcomes.

Protected area management effectiveness (PAME) assessment: is defined

by the IUCN World Commission on Protected Areas (WCPA) as the assessment of how well the protected area is being managed – primarily the extent to which it is protecting values and achieving goals and objectives. The term management effectiveness reflects three main themes:

- design issues relating to both individual sites and protected area systems;
- adequacy and appropriateness of management systems and processes; and
- delivery of protected area objectives including conservation of values.

EMEC: EUROPARC Management Efectiveness Commission

• PAME – one of the main tasks to establish and operate till 2030 (EU Biodiversity Strategy - 30x30, Nature Restoration Law, ...)

"You can't manage what you can't measure." (Peter Drucker)

EMEC: Membership

- Michael Hošek (EUROPARC Federation Council)
- Leelo Kukk (EUROPARC Federation Council)
- Ben Ross (EUROPARC Atlantic Isles Section, Nature Scot)
- Matti Tapaninen (EUROPARC Nordic-Baltic Section, Metsähallitus)
- Diego Garcia (EUROPARC Spanish Section)
- Elena Osipova (European Environment Agency)
- Erika Stanciu (IUCN World Commission on Protected Areas)
- Micheal O'Brian (expert)

EMEC: Goals

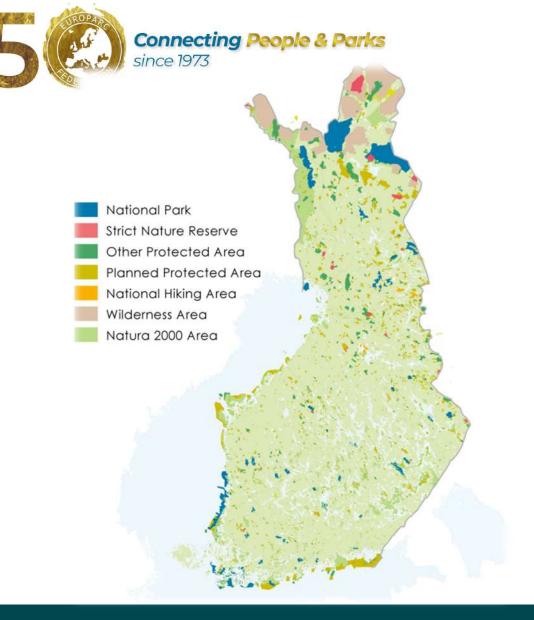

- 1.Clarification of expectations by our partners (European Commission / European Environment Agency) incl. EUROPARC members consultation
- 2.Desktop collation of existing methodological approaches and comparison analyses.
- 3. Developed recommendations of necessary actions.
- 4.Prepared project proposal for the pilot implementation. To develop new guidance.

Case Studies

Protected Area Management Effectiveness for Parks & Wildlife Finland

Matti Tapaninen

Evaluations 1994 ja 2004

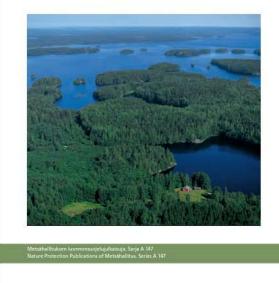

• 2004 recommendations:

- Ecosystem approach in planning
- National strategies for alien species and climate change
- Development for management planning and resources for it
- More focus to the outcomes of conservation
- Communications and participation. More focus with positive attidute to conservation
- Better understanding for environmental impacts of recreational services
- Wider economical background
- Better understanding of the international importance of Parks & Wildlife Finland
- Strategy for the management of cultural heritage
- State of Parks reporting

Brian Gilligan, Nigel Dudley, Antonio Fernandez de Tejada and Heikki Toivonen

Management Effectiveness Evaluation of Finland's Protected Areas

> Nationale Naturlandschaften

EUROPARC Conference 2023 – Tribute to our landscape Where nature and people meet in harmony Nationale Naturlandschaften

Quality Criteria and Standards for German National Parks

Evaluation procedures for reviewing management effectiveness Version 2.0

Areas of assessment

- Framework conditions
- Organisation
- Protection of natural biodiversity and dynamics
- Management
- Cooperation and sustainable regional development
- External communication
- Education and nature experience
- Research and monitoring

Czech approach

- Modification of the German criteria to Cz 1.
- 2. Establishment of the expert team
- 3. Assessment
- 4. Report separately for each NP as well as
- All financially covered by the Czech Ministry cheap...)

Hodnocení národních parků České republiky

Syntetická zpráva

Zpráva hodnotícího panelu prosinec 2019

inisterstvo životniho prostřed

EUROPARC Conference 2023 – Tribute to Where nature and people meet in h

Lessons learned

Pros

- Very accurately targeted assessment on a specific territory
- Clear and applicable recommendations
- Cooperation with stakeholders during the evaluation

Lessons learned

Cons

Quite demanding:

- Professional capacity
- time
- money

Green List – pilot study for Europe Case study 2 – Michael Hošek

Green List – IUCN Global Standard

Robust governance system

| Green List Committee | \$ |
|---|----|
| Green List Standard Committee | , |
| Green List Management Committee | , |
| Green List Operations Team | ; |
| IUCN WCPA Regional Vice-Chairs | , |
| Expert Assessment Group for the Green List (EAGL) | \$ |

- EAGLs are jurisdictional expert bodies convened by WCPA and approved by an assigned Reviewer. The jurisdiction of an EAGL is geographic (e.g. a country or region within a country) and is established and operates within the jurisdictions that have been approved by the Management Committee
- The primary tasks of an EAGL are to ensure that the IUCN Green List Standard is applicable in their jurisdiction and to evaluate PAs against the indicators of the Standard.

Project on modification of GL criteria to European conditions

- "...EAGLs are jurisdictional expert bodies convened by WCPA and approved by an assigned Reviewer. The jurisdiction of an EAGL is geographic (e.g. a country or region within a country) and is established and operates within the jurisdictions that have been approved by the Management Committee
- The primary tasks of an EAGL are to ensure that the IUCN Green List Standard is applicable in their jurisdiction and to evaluate PAs against the indicators of the Standard..."

Life Study on modification of GL criteria for Natura 2000

- 1. Modification of criteria
- 2. Stakeholders consultation
- 3. Pilot sites (Krkonose (CZ), Kaldoaivi (FI), Kullaberg (SE)
- 4. Final report to the European Commission

Lessons learned

Pros

- Comparison of conditions and needs of PAs in Europe versus other regions and globally (we are very specific!)
- Pilot studies (self-evaluation)

Lessons learned

Cons

- The criteria have not been sufficiently modified for our conditions because of the link to the global criteria
- Complex and challenging governance structure (EAGL)
- Unclear who should pay challenging process

Monitoring to Deliver Healthy Ecosystems

Scotland's protected areas

Lisa Davidson – Ecosystems Health Officer Dave Genney – Protected Area Monitoring & Surveillance Team Manager NatureScot

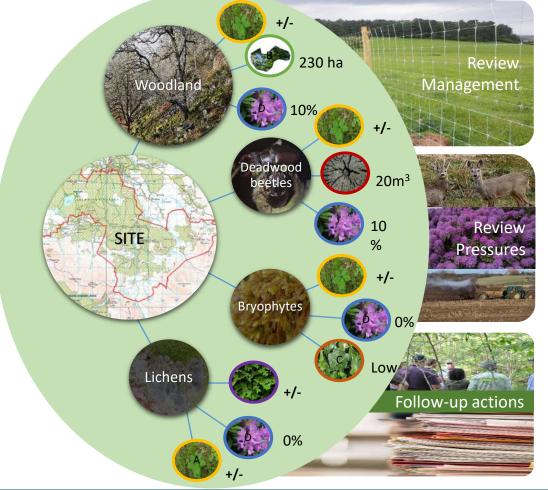

SCM monitoring

- Feature-based monitoring
 - Feature -> Attribute -> Target
- Attributes can be COMMON across features
- Targets can vary

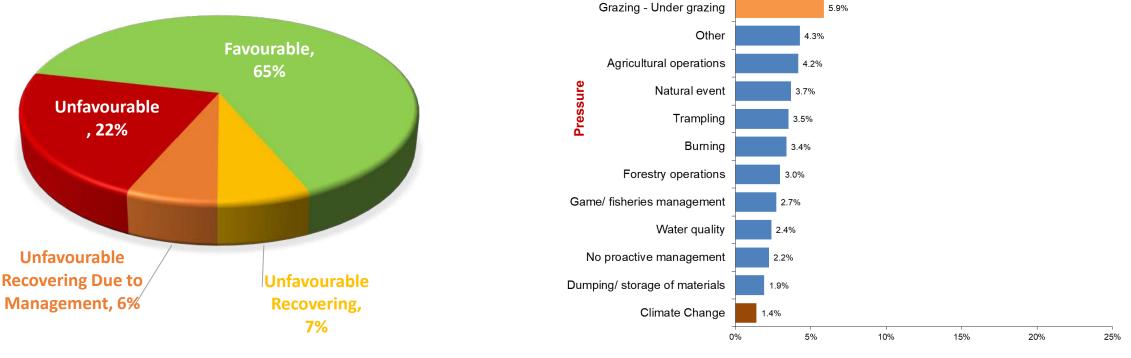

17.6%

21.2%

Has our monitoring delivered favourable features?

Invasive species

Grazing - Over grazing

Recreation/disturbance

Water management

Proportion of all pressures identified

8.8%

8.1%
