in total in the Transboundary Areas

> 280.000 ha of N2000

sites within the Transboundary Areas

> 1000 staff members

are employed in the Transboundary Areas

The EUROPARC

Transboundary Parks

Programme is a valuable and essential instrument for protected areas that adjoin across or lie adjacent to international borders and want to manage their protected areas co-operatively.

These „Magic Numbers“ show how the EUROPARC Transboundary Parks Programme has brought added value to the management of the participating parks.

Research conducted in October 2011 with over 80 % participation.

EUROPARC represents over 400 members in 37 countries. These include protected areas, governmental departments, NGOs and businesses who manage the green jewels of Europe's land, sea, mountains, forests, rivers and cultural heritage.
