LIFE e-Natura2000edu: Supporting e-learning and open education for Natura 2000 managers

Situation in Spain
Draft, June 20th 2018
Identification and assessment of competencies for management of Natura 2000

• Collection of information and desk analysis on:
  – the governance types / management structures that apply to the Natura 2000 network in Spain
  – management responsibilities and tasks assigned to the entities / individuals who are involved in the management of Natura 2000 sites at different levels (national, regional, local) in Spain
  – What are the implications of the approaches in Spain for Natura 2000 managers – what are they expected to know and do?
Natura 2000 in Spain: big, diverse, complex

- Huge network: Spain is the country with more Natura 2000 sites /area in Europe:
  - 22,36 million ha (18,8 million terr.)
  - 27% Spanish surface (terr.)
  - 8% marine
  - Over 2,000 sites: 1,467 SCIs / 644 SPAs
  - 4 biogeographical regions / 5 marine
Highly complex areas:

- Big areas (compared with other European N2000 sites):
  - Average size: 152 km$^2$
  - Europe: 35% sites < 100 ha, 31% >1.000 ha, 9% >10.000 ha.
  - Spain: 59% >1.000 ha, 24% > 10.000 ha,

- Inhabited

- Land uses: 74% natural / 24% agriculture/forestry
Natura 2000 in Spain

- 47% of Natura 2000 sites overlaps with other protected areas (National and Natural Parks, Nature Reserves, Protected landscapes, etc., under national and regional legislation)

Natura 2000 in Spain

The governance types / management structures

- All of them Type A. Governance by government:
  - 17 Regions + National Government (marine sites)
  - 17 organisational structures: biodiversity dept. / PA dept. / Provinces
    - Local administrations have no competence in management/planning N2000. Urban planning/activities are affected by N2000 → communication
  - Different planning models (80% management plans formally approved)
    - EUROPARC-Spain: quality criteria for RN2000 planning / capacity building
  - Funding:
    - General budget (underfunded)
    - LIFE projects, FEADER, FEMP, etc.
  - Land stewardship in Natura 2000: 900 agreements, aprox. 212,000 ha (at least)
Natura 2000 in Spain – Management

Management responsibilities and tasks assigned to the entities / individuals who are involved in the management of Natura 2000 sites at different levels

• Human resources:
  – General situation: understaffed
  – Government / public enterprises
  – If Natura 2000 overlaps PA: PA staff manages the site
  – Otherwise, best case scenario 1 or 2 managers / province in central services.

• Tasks:
  – Up to now, most of the efforts in planning (elaboration of management plans)
  – 70% preventive management actions (authorisations, reports on impact assessment, mainly)
Natura 2000 & training needs: old tasks, new challenges

What are the implications of the approaches in Spain for Natura 2000 managers – what are they expected to know and do?
