

WELCOME

[Climate Change Webinar, ep. 3]

Photo credit: Austin Neill

Webinars on climate change - episode 3

Climate change adaptation in Protected Areas: From theory to practice.

Prepared and facilitated by Olivier de Sadeleer, EUROPARC

Virtual conference guidelines

- The webinar is recorded
- Rename your profile to make it self explanatory
- Mute your microphone
- There is a Q&A session after the presentations, please use the chat.
- *Sit back and relax.*

This webinar is a collaborative effort of :

LIFE Natur'Adapt is a 5-year project developed with the support of :

Global changes threaten life on Earth

Nature structures and processes + human communities

Global changes threaten life on Earth
Nature structures and processes + human communities

Protected areas are at risk
&
Protected areas are a natural solution

Program of the day

- **Welcome** ✓
Olivier de Sadeleer, LIFE Natur'Adapt / EUROPARC Federation - 5'
- **Climate is changing. Why are we not acting?**
Ainhize Butron, IHOBE - 15'
- **A pilot case in a Mediterranean protected landscape**
José Antonio Atauri, EUROPARC-Spain/FUNGOBE - 20'
- **Assessment of evidences in 60+ reserves in England.**
Simon Duffield, ENCA / Natural England - 20'
- **Conclusion : Looking over the fence**
Olivier de Sadeleer Natur'Adapt/EUROPARC - 10'
- **Discussion** - 30' > End at 11.45

Coming next...

Climate is changing. Why are we not acting?

starring

Ainhize Butron, IHOBE

An aerial photograph of a wetland or delta region, showing a dense, intricate network of dark brown, winding water channels and smaller streams. The channels are set against a lighter, teal-colored background, likely representing marshland or sediment. The overall pattern is highly irregular and interconnected. Overlaid on this image is a white rectangular box containing the text "Take aways" in a bold, pink, sans-serif font.

Take aways

TAKE AWAY 1

Climate is changing and we are not acting.

Adaptation is a more of a societal problem than an environmental one.

It is all about **fighting dragons**

TAKE AWAY 2

Adaptation must happen *in the field, locally.*

Let us bridge global trends with local specificities, and empower staff locally, make science accessible

TAKE AWAY 3

Although uncertain, global changes are here today

**We need a to develop a PA
management culture that is
dynamic and inclusive**

Cherry on the pie

Experience shows that

***climate change adaptation measures
are usually in line with existing
good management practices***

A young girl with long brown hair is lying in a field of purple flowers. Her eyes are closed, and she has a peaceful expression. She is wearing a yellow and blue patterned top. The background is a dense field of green grass and purple flowers.

Climate is changing for everyone
**Looking over the fence
makes sense**

Thank you for coming.

If you would you like to get involved, **just call!**
