

Creating the **European Nature Academy**
for applied **Blended LEarning**

Get ENABLED!

Improve your skills and management practices for Protected Areas.

The **LIFE ENABLE** project will provide learning opportunities for **Natura 2000 and Protected Area managers**, to become more effective, competent and confident nature management professionals. The project will:

- Equip individuals and their organisations with **necessary competencies** to improve their management practices and increase the impacts of their work.
- Use a **blended learning** approach including online lessons and face-to-face networking - the emphasis will be on practical ways to apply the training for direct benefits in work, for their teams & organisations, and for nature.
- Focus on **Marine and Forest habitats**, providing managers with tailor-made training courses.
- Create the **European Nature Academy**, a European training hub for nature managers that will continue beyond the lifetime of the project.
