Questions and discussion among
participants

16:30 – 17:00

Last comments and
Conclusions

The questions

1. What are the key challenges of climate change that are affecting your Protected Area? How these challenges are impacting your cross border collaboration?

In particular please consider : natural disasters e.i. fires, water scarcity, alien species, other if there are (specify)

2. How the **crossborder cooperation can help** to face these challenges? **What are you already doing?** What do you think the park managers or the public authorities **have to do?**

Please use concrete examples if possible

3. **How can** the **EUROPARC** Federation **support** Protected Area managers, or managing authorities, in doing so?"
